## SUMMARY

Software Developer with hands-on experience building full-stack web applications using Django, React.js, Node.js, Java, and Python. Passionate about developing scalable, responsive, and user-focused software solutions with REST APIs, SQL/NoSQL databases, and modern JavaScript frameworks while continuously learning best development practices.

## EDUCATION

LJ Institute of Engineering and Technology — Ahmedabad, Gujarat

Bachelor of Information Technology — Sep. 2024 – Present

## PROJECTS

**Joyspoon(A mouth freshener E-commerce Website) :**

Developed a responsive mukhwas e-commerce website "Joyspoon" using HTML, CSS, and JavaScript with product listings, dynamic UI elements, smooth navigation, and a clean modern design focused on branding and user experience.

**BRTS Ticket Booking System (Streamlit) :**

Built a Python-based BRTS Ticket Booking System using Streamlit with ticket booking between stations, a dynamic dashboard, secure database integration, and OTP-based email verification for user authentication.

**SportsHub (MERN Stack) :**

A full-stack sports venue booking platform built with React, Node.js, Express, and MongoDB. The application allows users to browse sports arenas, check real-time court availability, and make secure reservations. Features include Redux for global state management, Razorpay integration for seamless payment processing, and interactive admin dashboards built with Recharts to manage courts, slots, and payouts.

## TECHNICAL SKILLS

- Languages : Java, Python, JavaScript
- Frontend Technologies : React.js, Tailwind CSS, Bootstrap
- Backend Technologies : Node.js, Express.js, Django
- Databases & Libraries : MongoDB, Mongoose, Pandas, NumPy, Streamlit
- Core Fundamentals : Data Structures & Algorithms (DSA), Database Management Systems (DBMS),Object-Oriented Programming (OOP)
- Tools & Platforms : Git/GitHub, VS Code, Jupyter Notebook, Vercel, Streamlit Cloud, Canva, Kiro
